ALTERNATE/IMPROVED ENGINE OIL TANK SEAL

Models Affected: All McDonnell Douglas Helicopter Systems (MDHS) 369H/D/E/FF and 500N Series Helicopters.

MDHS is discontinuing the sale of 369H8308 engine oil tank seals. Owners/operators should install a 369A8322 engine oil tank filler seal when the 369H8308 seal needs replacing. The 369A8322 seal has improved resistance to oil and is one-way interchangeable with the 369H8308 seal. The 369A8322 seal is now available at MDHS.

This letter is valid for one year after issuance date and may be removed from your files at that time.
